4G REMOTE SYSTEM ACCESS SERVICE

BY LAUREN SCHUSTER

We have the ability to provide 4G connectivity for your facility that can be used to create a stand-alone control system network. Full internet access to your control system(s) with complete isolation from your organizational network.

The initial equipment cost is minimal and the system can be installed by your maintenance personnel. The monthly service charge will be less than the cost of a single analog telephone line

(approximately \$125/month). If you are currently using multiple telephone lines for access to multiple control systems, our service is less expensive.

Training Information and Schedule

Training Enrollment

LOGIC Technologies, Inc. conducts in-depth training sessions at our facility on a monthly basis. Two free sessions are included with each system purchased. Additional training sessions are available for a nominal fee. Operator training sessions are \$850 per person and advanced training sessions are \$950 per person. We provide lunch for each class day; however, all other travel expenses are your responsibility.

Operator-Level Sessions

This class session provides overview coverage of the use of our system to maintain the daily operations of a refrigerated facility. The class is conducted by one of our senior engineers who have many years of experience designing refrigeration control systems. In effect, the classes are taught in layman's terms by someone who fully understands the issues faced by refrigeration operators.

October 14-15
December 16-18

Advanced SST Sessions

This class session provides in-depth coverage of the screen and report development tools. Also, briefly covering the script language used to develop control algorithms. These classes are conducted by senior members of our engineering staff. Prior technical and basic programming knowledge is a pre-requisite for this course.

November 11-13

*Seating is limited, make your reservations early by contacting
Kim Smith
(770) 389-4964 ext. 6611
ksmith@logictechnologies.com

The system allows multiple users to access a system simultaneously. Let us provide 4G connectivity for your facility.

Advantages

- System Alarms Texted to Cell Phones
- Full Internet Access with Complete Isolation from your Plant-Wide Network
- Fast 4G Connectivity
- Allows Multiple Users
- Rugged Cell Modem and Hardware
- Remote Tablet Support

LT.03403209 4G Modem
\$1,240.00
